

## C O N T E N T S

**Section 1: 7kW-200kW -- 120/240V 1ph Standby Permanent Generators, Transfer Switches, Options & Services**

**Section 2: 10kW-600kW -- 120/208V 3ph Standby Permanent Generators, Transfer Switches, Options & Services**

**Section 3: 10kW-1000kW -- 277/480V 3ph Standby Permanent Generators, Transfer Switches, Options & Services**

**Section 4: 10kW-600kW -- 120/240V 3ph Standby Permanent Generators, Transfer Switches, Options & Services**

**Section 5: 100kW-9000kW -- 120/208V 3ph & 277/480V 3ph Standby Modular Generators, Transfer Switches, Options & Services**

**Section 6: 1.8kW-17.5kW -- Portable Generators & Manual Transfer Switch**

**Section 7: 10kW-600kW -- Base Models- Standby Permanent Generators**

These Generators can be purchased WITH the option Package that is recommended by the dealer for proper operation and installation; or with SOME of these options; or with NO options. All of the Generators in Sections 1-5 INCLUDE the recommended Package, which also includes an additional 2% discount on the Generator and accessories as described on pages 2-5 of this Table of Contents. Page 6 of the Table of Contents shows you how to REMOVE features and their pricing. If you remove all features, you get a stripped version of that Generator called a Base Model. Section 7 gives you some examples of BASE MODELS, and the situations where they can be used.

Only factory-standard equipment is included with the Air-Cooled and QT Air-Cooled Generators listed in Section 1, Page 1. There are four options for these units listed separately in Section 1, Page 5. There are no options for the Portable Generators in Section 6.

### **How to use this price list:**

A. **FIRST - VOLTAGE:** Determine required voltage and proceed to appropriate section noted above.

B. **SECOND - KW:** Generators are presented in order of kW (kilowatt) size, and transfer switches in order of Amperage.

C. **THIRD - FUEL:** Within each kW size, the natural gas-fueled generators are presented first, then the propane-fueled, the diesel-fueled, and last the Bi-Fuel (Diesel/Nat.Gas).

**PROPANE CONVERSION:** Since gaseous generators of 48kW and below are only shipped set up for natural gas, a simple field conversion will be required to use propane. See the Owner's Manual for exact instructions.

### **Special Notes:**

D. **FREIGHT:** Freight is included from the manufacturer to your loading dock or jobsite.

Please call for a possible reduction in price if the freight or service costs to your location are less than we estimated.

E. **BATTERY FOR STANDBY:** is included for all QT-NFPA, INDUSTRIAL, & DIESEL Generators.

QT and air-cooled generators of 60kW and below are shipped without a battery, so you will need to supply it.

F. **BATTERY FOR ELECTRIC-START PORTABLE:** Those portable generators that are electric start are shipped without a battery, so you will need to supply it. See the spec sheet or owner's manual. Most electric-start portables can also be started by a pull-cord recoil start.

**Disclaimers:** Specifications on these pages are for convenience only, and could have changed. Please go to [www.generac.com](http://www.generac.com) for the latest specification sheet.

Better Power, Inc. is not responsible for errors.

**Contract Reference:** National Association of State Procurement Officials (NASPO/NY) Multi-State HIRE (Hazardous Incident Response Equipment)

Contract #PC62003 (Group 38232, Award 19745). For your reference, here is the Multi-State Contract link that is maintained by New York State as NASPO's Lead State for the Contract: [www.ogs.state.ny.us/purchase/spg/awards/3823219745CAN.HTM](http://www.ogs.state.ny.us/purchase/spg/awards/3823219745CAN.HTM), then click "Pricing Information" and then click "Better Power, Inc."

## Generac Equipment Packages for Standby Permanent Generators

**The Contract Price for our QTA, SG and SD Models includes a "Heavy-Duty Maximum Performance Package",**

to ensure that you are able to operate and to accomplish your mission, even in an emergency that takes out utility power. Generac's base model incorporates a long list of equipment that may only be optional on other brands, and our Package adds major upgrades and essential accessories to better serve your needs. If these items had to be purchased and installed after-market, it would be far more expensive and in the meantime, the User would be lacking the additional protection. See the tables on the following pages for more information on what is included in our Package that may not be standard elsewhere.

**Examples of Life Safety concerns that may require a Generator Model QTA, SG or SD from Sections 1-4:**

- |   |  |
|---|--|
| -Elevator   | -Oxygen or life support equipment that requires electricity  |
| -Fire pump/sprinkler system pump  | -Industrial processes where current interruption would produce serious life safety or health hazards |
| -Fire detection and alarm systems   | -Building over 75 feet tall  |
| -Public Safety communications systems   | -Health care loads greater than 120kW  |
| -Essential ventilating and smoke removal systems  | -Facility used as a community Emergency Shelter  |
| -Life safety illumination (i.e. lighting allowing safe egress or exit signs without battery backup) |  |

**QTA or "QT-NFPA" Quiet Test Series-** with QTA Heavy Duty Maximum Performance Package

Natural Gas or Propane. Liquid cooled. For heavy-duty high-reliability applications that do not require custom equipment changes. Exceptionally quiet. Includes the equipment necessary to meet NFPA-110 Life Safety when properly installed.

**SG Industrial Series-** with SG Heavy Duty Maximum Performance Package

Natural Gas or Propane. Liquid cooled. For heaviest-duty highest-reliability applications. Custom equipment changes can be made. Includes the equipment necessary to meet NFPA-110 Life Safety when properly installed.

**SD Industrial Series, Diesel-** with SD Heavy Duty Maximum Performance Package

Similar to the "SG" Industrial Series, but diesel-powered. Liquid cooled. Custom equipment changes can be made. Includes the equipment necessary to meet NFPA-110 Life Safety when properly installed. Package includes upgraded larger engine size and a sub-base tank sized for a minimum of 24 hour run time on 100% load.

**The Contract Price for our QT Liquid Cooled Models includes a "Standard Duty Performance Package".** See the table on the next page.

**QT Quiet Test Series-** with QT Standard-Duty Package

Natural Gas or Propane. Liquid cooled. Supplies reliable power for basic applications that do not involve any Life Safety Concerns. Exceptionally quiet. NO custom equipment changes can be made. Attention California Users: QT Models with a 'Y' in the Model number meet California emissions standards.

**Air-Cooled Series**

Natural Gas or Propane. Air cooled. These are light-duty inexpensive generators for residential applications such as some group homes, and very small commercial applications. NO custom equipment changes can be made.

**Generac Equipment Package Comparison**

 NASPO HIRE BL&P 03-10-09

**Heavy Duty Maximum Performance Package Feature Descriptions for Generac Models QTA, SG, & SD**

<b>FEATURE</b>	<b>DESCRIPTION</b>
<b>Life Safety Equipped</b>	Generator as a whole is UL2200 Listed, and includes the equipment necessary, when properly installed, to qualify for the stringent NFPA 110 Level 1 Life Safety applications of the National Fire Protection Association.
<b>Fuel (non-Diesel)</b>	Natural gas or propane (whichever is ordered) operation, clean-burning for fewer exhaust emissions. No diesel odor, no need for expensive double-walled diesel tanks, no diesel fuel maintenance requirements, and no risk of environmental liability from diesel fuel spills. Natural gas can also eliminate refueling concerns, because natural gas is constantly supplied through the pipeline.
<b>Fuel Tank (Diesel only)</b>	Sized for a minimum of 24 hour run-time between re-fuelings (usually 24" deep), sub-base fuel tank mounts under the generator and includes the emergency vent that is required for safety. These fuel tanks are double-wall tanks for extra protection against leaks that could trigger a HazMat cleanup, and are UL142-Listed.
<b>Fuel Gauge</b>	A fuel-level sender included to show how much fuel is in the diesel tank, helping to avoid running out of fuel when you really need it. (Diesel only)
<b>EPA Certified Engine</b>	The Environmental Protection Agency establishes emissions requirements for generators. All of our Generac generators comply with EPA requirements and are EPA certified.
<b>Gas Flex Hose</b>	Necessary for the installation of the non-diesel generators in Sections 1-4. Prevents damage from vibration and movement.
<b>Tech Support</b>	Our Tech Support includes the experience of Better Power, Inc. and factory technicians.
<b>Freight</b>	Included are freight charges to any loading dock accessible by tractor trailer via land only in the 48 contiguous States. All deliveries are FOB destination with all transportation and handling charges paid by Better Power, Inc. Delivery dates are estimated and cannot be guaranteed. Unloading, inside delivery, rigging, storage, and installation are not included.
<b>Main Line Circuit Breaker</b>	Factory-installed and UL-Listed. Stops the wires from overheating before they can cause a fire or other safety hazard, and is required to meet UL2200.
<b>Block/Coolant Heater</b>	Keeps diesel fuel flowing easily in cold weather so that the starting motor is able to start the generator even if the temperature goes below minus 20 degrees F. Helps propane or natural gas maintain proper vapor pressure.
<b>Outdoor Housing</b>	Enclosure to protect the generator from the weather, lockable to deter vandalism. Finished with highly-durable textured powder-coat paint that provides consistent coverage and better bonding to seams and exposed edges providing durability and a long-lasting, tough finish.
<b>High Capacity Battery</b>	A starting, high-capacity battery with factory installation is included with our Heavy Duty Maximum Performance Package.
<b>Battery Charger</b>	Factory-installed, high-capacity, dual-rate battery charger. This uses utility power to keep the battery charged even when the generator is not running.
<b>Battery Heater</b>	With built-in thermostat. When temperatures fall below an acceptable level, the thermostat activates the battery warmer maintaining optimum battery temperature for the best generator starting. Battery may require replacement more frequently.
<b>Critical Grade Muffler</b>	"Critical-grade exhaust silencer" - much quieter than Industrial grade or even Residential grade. Installed within the housing, for additional quieting and for best appearance.
<b>Excitation</b>	Strength of magnetic field, for voltage adjustment. Brushless Excitation eliminates the brush sparking in direct excitation, reducing safety hazards in some areas. Excitation is provided by a static system, requiring much less maintenance, and is automatically removed whenever the motor is out of step. Permanent Magnet Excitation provides sustained short circuit current for breaker coordination, increases motor starting capabilities, and enhances performance when load-induced harmonics are present.
<b>Engine Run Relay</b>	Factory-installed. When the engine is running, this allows the operation of a safety alarm or indicator, as well as the operation of other equipment, such as cooling louvers.

**Heavy Duty Maximum Performance Package Feature Descriptions for Generac Models QTA, SG, & SD**

<b>FEATURE</b>	<b>DESCRIPTION</b>
<b>Isynchronous Electronic Governor</b>	Constant speed control provides faster response to block loads and more consistent output frequency. All generators utilizing PowerManager control systems feature an isochronous governor.
<b>Remote Annunciator Panel</b>	With 21 indicator lights. Mounts inside an office showing in real time whether everything is functioning correctly or if something needs attention. Required to meet NFPA-110. Surface mounting will be supplied unless recessed mounting is specified.
<b>Digital Control Panel</b>	State of the art digital control of the generator. Full system monitoring, sensors, indicators and trouble shutdowns.
<b>UL2200 Listed</b>	UL Listing verifies the kilowatt ratings of our generators and is your assurance that Generac standby systems meet safety, endurance, and performance standards.
<b>Closed Recovery Cooling System</b>	Closed, pressurized system virtually eliminates the introduction of air into the cooling system. Rust and fluid acidity are minimized, resulting in longer engine life.
<b>Vibration Isolation</b>	Standard vibration isolators virtually eliminate transmission of vibration from the unit to the mounting surface.
<b>Automatic Alarms and Shutdowns</b>	Generator functions are constantly monitored through a protective system that features solid state circuitry for reliability and long life. NFPA 110 required warnings and alarms provide alerts for a variety of safety and operational concerns. The system automatically shuts down in response to certain critical conditions such as high engine temperature, low coolant level, etc. All generators with PowerManager control systems meet NFPA 110 requirements for warnings, alarms and alerts.
<b>Advanced Wire Harness Design</b>	Generac's wire harness design with waterproof connectors assures reliable, repeatable interconnection between circuit components. Special sealed connectors protect against moisture, dust and environmental damage.
<b>Generac Manufactured Alternators</b>	Generac's revolving field alternators are fully insulated and self ventilating. They feature higher temperature Class H insulation, but are designed to operate at lower Class F temperature levels for longer life. Oversized alternators are available on many models for additional motor starting capacity.
<b>Solid State Sensing and Starting Control</b>	Provides the ultimate in engine protection. The magnetic pickup senses overspeed, automatically shuts down the engine, disconnects the starter motor and prevents re-engagement. The system also provides cyclic cranking for improved starting reliability, and cranking termination for started motor protection.
<b>Solid State Voltage Regulation</b>	Solid-state frequency-compensated voltage regulation that provides fast, optimized response to changing load conditions. Maximum motor starting capability is assured by electronically torque-matching the surge loads to the engine.
<b>On Site Start Up</b>	After installation, a technician visits your site for several hours to verify that installation was done according to factory requirements, to test many parameters, adjust them for best performance, and to validate the Warranty. NOT INCLUDED WITH BASE MODEL.
<b>On Site Training</b>	Training for the staff in basic operation and maintenance of the generator, during the Start Up site visit by a factory authorized technician. NOT INCLUDED WITH BASE MODEL.

## Generac Modular Power Systems (MPS)

### Multiple Generator Combinations

**MPS** combines the output of multiple smaller gensets to provide power from **100 - 9000 kW** without the addition of expensive switchgear.

**MPS** allows you to accommodate potential growth. Simply buy the system you need today and easily add gensets as your power needs increase. No need to replace the entire system or purchase a large system that might never be required.

**MPS** provides redundant backup for greater system reliability.

**MPS** allows individual gensets to be taken offline for service without losing coverage of the critical load.

Additional gensets can be added quickly and easily.

**MPS** gensets can be separated and are light enough for roof mounting, so you can take better advantage of available space.

**Fuel Options:**

- Gaseous: **100 - 4500kW**
- Diesel: **300 - 9000kW**
- Bi-Fuel™: **600 - 9000kW**
- Combination: **300 - 9000kW**

**Enclosure**

- MQT Units: priced for Steel enclosures - Upgrade to Aluminum is available per unit.
- MG, MD, & Bi-Fuel Units: priced w/ Outdoor Weather enclosure - Upgrade to Sound Attenuated available per unit.
- Gemini: Available in Sound Attenuated Enclosure only.

**Pricing:**

When buying just one unit the Base model (denoted - b ) is required. If buying two or more units; 1 base model and the corresponding number of extension units (denoted - e ) are required for ordering.

**MPS combination requirements:**

**MQT100** can only be matched with MQT100s - (Gaseous)

**MQT150** can only be matched with MQT150s - (Gaseous)

**MG200s, MD500s, MD600s, Gemini, & Bi-Fuel,** can all be mixed and matched together - (Gaseous, Diesel, Bi-Fuel: Diesel & Gaseous)

**Examples - these are a few of the many possible combinations:**

<p><b>200kW:</b> 1 - MQT100 - base unit 1 - MQT100 - extension units Total units needed = 2 Total kW output = 200kW</p>	<p><b>600kW:</b> 1 - MQT150 - base unit 3 - MQT150 - extension units Total units needed = 4 Total kW output = 600kW</p>	<p><b>600kW:</b> 1 - MD600 - base unit Total units needed = 1 Total kW output = 600kW</p>	<p><b>2000kW:</b> 1 - MG200 - base unit 9 - MG200 - extension unit Total units needed = 10 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 2 - Gemini units Total units needed = 2 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 1 - Gemini unit 2 - MD500 - extension unit Total units needed = 3 Total kW output = 2000kW</p>
<p><b>200kW:</b> 1 - MG200 - base unit Total units needed = 1 Total kW output = 200kW</p>	<p><b>600kW:</b> 1 - MQT100 - base unit 5 - MQT100 - extension units Total units needed = 6 Total kW output = 600kW</p>	<p><b>600kW:</b> 1 - MB600 - base unit (Bi-Fuel) Total units needed = 1 Total kW output = 600kW</p>	<p><b>2000kW:</b> 1 - MD500 - base unit 3 - MD500 - extension unit Total units needed = 4 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 1 - MB600 - base unit 1 - MD600 - extension unit 4 - MG200 - extension unit Total units needed = 6 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 1 - MB600 - base unit 2 - MD600 - extension unit 1 - MG200 - extension unit Total units needed = 4 Total kW output = 2000kW</p>
<p><b>300kW:</b> 1 - MQT150 - base unit 1 - MQT150 - extension units Total units needed = 2 Total kW output = 300kW</p>	<p><b>600kW:</b> 1 - MG200 - base unit 2 - MG200 - extension unit Total units needed = 3 Total kW output = 600kW</p>	<p><b>900kW:</b> 1 - MQT150 - base unit 5 - MQT150 - extension units Total units needed = 6 Total kW output = 900kW</p>	<p><b>2000kW:</b> 1 - MD600 - base unit 2 - MD600 - extension unit 1 - MG200 - extension unit Total units needed = 4 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 1 - MB600 - base unit 2 - MB600 - extension unit 1 - MG200 - extension unit Total units needed = 4 Total kW output = 2000kW</p>	<p><b>2000kW:</b> 1 - MB600 - base unit 1 - MB600 - extension unit 1 - MD600 - extension unit 1 - MG200 - extension unit Total units needed = 4 Total kW output = 2000kW</p>

## Generac Standby Permanent Generators - Base Models Where They Work and Where They DON'T Work

The Base Models are VERY BASIC generators that generate the rated kilowatts of power – BUT ONLY IN CERTAIN SPECIAL SITUATIONS described in the list below.

Do not buy these models unless you are certain that you have one of these special situations. Generators are not returnable. Once you have proven to yourself that the “Base Model” pricing is much better than other vendors, you can order the complete Contract Model with confidence. The specifications/features in the complete Contract Model are listed on page 3 of the Table Of Contents at the beginning of the entire pricelist. See the Generac Equipment Package comparison page 3.

Almost all Contract Users should buy the corresponding Contract Model from sections 1 - 4 & 7 of the Price List. These other (non-Base) Contract Models include the equipment and services necessary for the following:

1. To make it as certain as possible that the generator WILL work in that emergency situation where it MUST work.
2. To avoid problems for Users, some of whom have discovered the hard way that they should have ordered the regular Contract Model package.
3. To have confidence that engineers who have specialized in generators for many years have specified the right equipment for almost all applications, which may save you the delays and expense of the bid process.
4. Several of the complete Contract Models are heavy-duty enough to meet the Life Safety Code, NFPA-110. To see if your application is covered by the Life Safety Code, please see page 2 for the list of Life Safety concerns in the overall Table Of Contents

### Special Situations Where Base Models May Be Usable

The items listed below are NOT included for the Base Model, but ARE included for the Contract Models in Sections 1-4 for our Contract Packages. The list below is for the diesel models. For a full listing of features that are in the various Contract Models, see Table of Contents, page 3.

<b>Not Legal for Use in a Life Safety Application</b>	Base Model is missing the items that ensure the greater reliability that is required for the applications listed on page 3 in the overall Table Of Contents.
<b>No Fuel Tank</b>	Base Model must be used where User has his own separate fuel tank. The Base Model does not include the Contract Package 24-hour fuel tank mounted under the generator, and is also missing the emergency vent that is required for safety.
<b>No Fuel Gauge</b>	Base Model is for applications where there is no built-in fuel tank, so the User must supply the fuel gauge for his own fuel tank.
<b>No Block/Coolant Heater</b>	Base Model must be used where the temperature stays warm, and for non-Life Safety applications. A block heater is needed to keep the diesel fuel flowing in the winter so that the starting motor is able to start the generator easily.
<b>No Outdoor Weather Protective Housing</b>	Base Model must be used in an indoor location with ventilation louvers where a Professional Engineer has certified that the ventilation is adequate to cool the generator, and that the fumes from fuel and exhaust will not infiltrate the building. The generator is also significantly louder than those with a housing, and you will not have the ability to lock the generator to deter vandalism. More than 99% of generator users install their generator outdoors.
<b>No Battery Heating Blanket</b>	Base Model must be used where the temperature stays warm, and for non-Life Safety applications.
<b>No Muffler</b>	Base Model must be used where a long exhaust-pipe run can act as a muffler.
<b>No Permanent Magnet Excitation</b>	Base Model must be used where other excitation methods do not cause a problem. DC Direct Excitation is a high-maintenance method and doesn't handle high current well. Brushless (Shunt) Excitation amplifies harmonic distortion from computers and other electronics.
<b>No Engine Run Relay</b>	Base Model must be used where there is no safety alarm or indicator or other equipment to operate, such as cooling louvers.
<b>No Remote Annunciator Panel</b>	Base Model must be used in non-Life Safety applications, because the Remote Annunciator Panel is required for NFPA-110 Life Safety Code. With the Base Model, the User has to remember to go out to the generator and lift the lid to see whether everything is working right at that moment. Without this panel you could have decreased reliability and increased repair expense -- the panel is mounted in your office to give you an immediate indication that generator functions are not within specs, so immediate corrective action can be taken before breakdown.
<b>No Start Up Services</b>	Base Model installers must be very experienced with generators to do their own Start Up, and will have no one checking their work. Start Up also includes warranty validation.
<b>No Training Services</b>	Operating and maintenance crews must study the literature and know how to operate and take care of generators.
